# LINING OUT STOCK

## For Winter-Spring Shipment, 1932

CHASE, ALABAMA, Jan. 22, 1932.

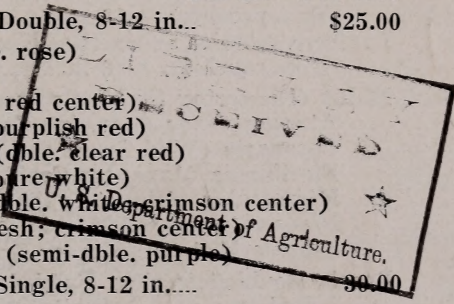

Except as noted this Lining Out Stock is grown in WIDE NURSERY ROWS, has had a full season's cultivation and has developed into heavier, stockier, better rooted plants than can be grown in beds. Ask your neighbor nurserymen as to their success with Chase's Alabama Grown Liners.

### CHASE NURSERY COMPANY.

NANDINA DOMESTICA, Twice transplanted, 6-8 in..... (Bright red foliage; scarlet berries in fall and winter.)	12.50

## CONIFEROUS EVERGREENS

Two and three year olds have been at least twice transplanted; the two year plants have had one, the three year two full years in WIDE NURSERY ROWS; one year plants are in beds. All are well rooted, are immediately puddled (in field) as lifted, and handled under tarpaulins. Established plants from nursery row grow off quicker and stronger than bed-grown stock.

*All Are Priced Per 100 With Puddled Roots.*

ORDERS FOR CONIFERS ACCEPTED FOR ANY QUANTITY.

	Per 100
